FOREWORD

REGIONAL DISTRICTS IN BRITISH COLUMBIA

The following facts are intended for the benefit of those who are not familiar with the Province of British Columbia, particularly as it may relate to local government, and should place the situation in some perspective.

The Province covers a very large area of some 948 000 square kilometres, being roughly 1 100 kilometres long by 800 kilometres wide. It is almost entirely within the Cordilleran Region and because of its mountainous nature less than 2 per cent is arable farm land. The major base resources are the vast softwood timber lands, minerals, oils, and natural gas, and some 32 000 000 kilowatts of potential water power—about one third of the national total. Because of the topography, people have settled mainly in numerous communities in the various valleys. Portions of these valleys have been established as municipalities and these comprise just over one half of 1 per cent of the land area but contain 80 per cent of the population.

Our local government structure consists of incorporated municipalities (cities, towns, villages and districts), school districts, regional districts, improvement districts, and a number of special purpose districts. Excluding the northwest corner of the Province which borders the Alaska panhandle, the remainder of the Province is divided into 75 school districts and 28 regional districts.

This in effect means that a number of regional districts encompass the same area as two or three school districts. These, if you like, are superimposed upon the municipalities and the nonmunicipal areas of the Province. Improvement districts have been created to provide, usually, a single service such as water or fire protection for a nonmunicipal community. Lastly, the single-purpose districts have been likewise established to provide a common service for a number of municipalities, for example, water on a wholesale basis to the members.

Turning now to regional districts, legislation was introduced in 1965 which made it possible to provide a federated approach to local control over problems transcending municipal boundaries in either a metropolitan area or in a nonmetropolitan trading area. The structure was patterned after that employed in the case of single-purpose districts such as the Greater Vancouver Water District. However, two basic changes were made to this pattern. First, a single regional district and its governing board could be responsible for more than one activity or function, and secondly, nonmunicipal areas could be represented on the board and participate in its activities as if it were a municipality.

Representation of the municipal council on the board is by council selection of one or more of its members as determined by its quota on the board, and by direct election in the case of nonmunicipal areas which for the purposes of these districts are designated electoral areas. Voting strength or rights on the board are roughly proportional to the population of the member municipality or electoral area. Decisions of the board are usually on the basis of a majority of the votes, although some purposes may require a majority of directors having a majority of the votes. One member of the board (called a director) may carry a maximum of five votes.

In 1967, legislation was introduced which provided for a companion corporation to assume the local responsibility for providing hospitals, with the two corporations having a common board.

One distinction between the two is that in the case of the hospital function all member areas must participate on a common basis. For regional districts a member area may or may not participate in most functions at its own option, and costs for a function are shared only by those who are participating. Most of the powers of a regional board are set out in Letters Patent because they vary as between regions. Regional districts recover their expenditures either by the sale of a commodity or service, for example, water, or by requisitioning from the member municipality, or from the Provincial Government in the case of nonmunicipal areas, for ultimate imposition by taxation through the Provincial property tax or through municipal taxes.

Legislation was enacted in 1969 establishing the Municipal Finance Authority of British Columbia, the members of which are appointed by the Regional District Boards throughout the Province. The object of the Authority is to provide financing for the regional districts and their member municipalities by the issue of debentures or other evidence of indebtedness and lending the proceeds to those areas on whose request the financing is undertaken.

Further information regarding the operation and activities of regional districts may be found in the annual report of the Ministry of Municipal Affairs and in the annual report of financial and other statistics of municipalities, regional districts and improvement districts in British Columbia. Both of these publications are available through the Queen's Printer Bookstore.
